
POLYTUNNELS

~ DIFFERENT POINTS OF VIEW

*As a parent and ecologist
I am bothered by the "unnatural"
growth and extended growing
season – what chemicals are used?
Are they safe? Are they organic?*

*They are right opposite us
and look like a sea shining in the
sun. They give off a tremendous
reflection which is blinding.*

*There are many more
pressing problems for us to
face in relation to our planet.
The polytunnel question is
an area we should look at as
it may touch on issues we as
a group are concerned
about.*

*We are upset that our view has
gone for the best part of the
year, the hum and noise from
the fruit picking is disruptive.*

*I love strawberries but was
horrified to learn that most
supermarket ones are grown
in polytunnels – are they good
for you?*

*Local people aren't interested
in working for me – the hours,
the times and they won't work
for the money.*
